UMAC Auditors' Report 2026

We had access to all necessary information regarding incomes and expenses of UMAC and can certify that the financial report presented is all in order.

In line with UMAC strategic plan we recommend that UMAC increases its spending to support its strategic priorities, including membership expansion and engagement in underrepresented regions with significant university museum collections; member-led projects addressing regional concerns, including local-language communication and translation; and the Teaching With Objects Working Group.

Additional funding should support knowledge exchange and projects addressing human remains in university collections, as well as the organisation of UMAC meetings and related activities that facilitate participation, global exchange, networking, and the sharing of members' expertise.

We recommend that the 26th UMAC General Assembly in Patras, Greece, approves this report.
